Managing Director's Statement 董事總經理報告

REVIEW OF RESULTS

Basically, the principal business activities of the Group remain the same for both years 2005 and 2004. Turnover of the Group decreased by 19.5% from HK\$685.2 million in 2004 to HK\$551.8 million in 2005. In 2005, an insignificant amount of turnover was recorded in respect of sales of development properties comparing to a turnover of HK\$152.2 million in 2004. The decrease in turnover of sales of development properties was the major reason leading to the decrease in the Group's turnover.

In 2005, turnover of dealings in distressed assets decreased by HK\$15.7 million and turnover of investment increased by HK\$25.4 million. The magnitudes of the former approximated to that of the later and thus did not have a material net effect to the movement of the Group's turnover.

Other income recorded an increase of HK\$78.3 million. The reasons for the increase were firstly attributable to the increase in interest income in the amount of HK\$41.4 million. The Group accumulated a cash balance in excess of HK\$1.0 billion in the fourth quarter of 2004. Throughout the year 2005, the Group maintained a relatively high amount of average cash balances, which enabled the Group to earn extra interest income during a period of rising deposit interest rates. Secondly, there was an unrealized holding gain in the amount of HK\$44.9 million in respect of investment in held-for-trading investments recorded only in the year.

Increase in administrative expenses of HK\$7.2 million was mainly due to the increase in staffing cost of HK\$10.9 million and payment of additional direct costs such as professional fees, legal fees and

董事總經理報告

Increase in finance costs amounted to HK\$27.6 million. The increase in finance costs were due to the issuance of convertible notes with principal amount of HK\$817.1 million in aggregate by the Group in November 2004. The convertible notes have interest charges for less than two months in 2004 but a whole year for 2005. Despite of the coupon interest rates of the convertible notes were 1.5% p.a., interest for one of the convertible notes was charged at 4.48% p.a. in accordance with the requirements of the new accounting policy.

In 2005, the Group increased its investment in Beijing East Gate Development Co., Ltd. ("East Gate") by acquiring an additional 7.99% equity interest of East Gate from a minority shareholder. The acquisition resulted in a discount on acquisition (previously known as negative goodwill) in the amount of HK\$73.5 million and was recognized as income for the current year. There was no such income in last year.

In 2004, the Group disposed of a 20% participating rights in a portfolio of distressed assets and realized a gain of HK\$53.8 million. The Group also disposed of a subsidiary and an associated company in 2004 and realized gains in the amount of HK46.7 million and HK\$0.2 million respectively. There were no such gains on disposal in 2005.

As a whole, the above-mentioned factors have a net effect leading to a 79.4% increase in net profit for the year to a historically high amount of HK\$724.1 million in 2005.

FINAL DIVIDEND

The Board of Directors of the Company ("Directors") resolved to recommend the payment of a final dividend of HK\$0.06 per share for the year ended 31 December 2005 (2004: HK\$0.05 per share). The final dividend will be payable on 6 June 2006 to shareholders on the register of member of the Company on 25 May 2006.

董事總經理報告

During the year, the Group has increased its investment in East Gate by acquiring an additional equity interest of 7.99% from a minority shareholder of East Gate at a total consideration of HK\$13.4 million. The acquisition resulted in a negative goodwill of HK\$73.5 million and was recognized as income during the year. In the third quarter of 2005, agreements were entered between the Group and the remaining minority shareholders of East Gate to acquire the remaining equity interests in East Gate. The total consideration payable by the Group was HK\$25.3 million. When the acquisition was completed, East Gate will become a wholly owned subsidiary of the Group. In addition, a negative goodwill in the amount of approximately HK\$25.1 million (estimated amount and before expenses) will be recognized as income in 2006.

During the year, sales of development properties were insignificant which had resulted in an operating loss of approximately HK\$6.0 million in 2005. The Group has commenced selling of the second phase of the development project in the Tiexi District of Shenyang known as the East Gate Metro Garden. Contracted sales in the amount of approximately HK\$169.2 million in aggregate have been secured. The Directors expect that total sales amount for East Gate Metro Garden will be approximately HK\$423.1 million. The Group intends to complete the selling of the units of East Gate Metro Garden in 2006. At the same time, the Group has started planning the third phase, which is also the last phase of the Tiexi District development project.

The operations of Beijing Yinda Property Management Limited ("Yinda") were stable for both the year under review and the last year. The development project has a site area of approximately 320,000 square meters and gross floor area of approximately 830,000 square meters. The Group intends to develop the Zi You Xiao Zhen project by four phases in four years' time. The project is now in the process of demolishing and re-dwelling the existing tenants.

董事總經理報告

Infrastructure Investments

For the year ended 31 December 2005, profit contribution from CII was HK\$80.6 million (2004: HK\$87.8 million). The relative stable profit contribution from CII to the Group is maintained through disposals of the road and bridge projects, which are capable of generating one-off gains. CII disposed of its entire interest in the Wuhan Baishazhou Bridge at a total consideration of approximately HK\$460.3 million and realized extra fund for working capital. However, a loss of approximately HK\$12.9 million in respect of the disposal was recognized in 2005 and that was the main reason for the decrease in the contribution from CII.

Strategically CII will dispose of all the road and bridge projects when opportunities arise. As at 31 December 2005, CII was still holding four road and bridge projects with a total carrying value of approximately HK\$407.7 million in aggregate. For the time being, CII is considering to increase its investment in energy supply, value-added processing in petrol refining and other financial investments.

The Taian Natural Gas Pipeline project

CII invested in the Taian Natural Gas Pipeline project in late 2002. It is a co-operative joint venture project with an investment term of 25 years. The effective interest of CII in Taian Natural Gas Pipeline project is 80% and the cost of investment is approximately HK\$91.9 million. The project commenced its first year of operations in 2005 and started to generate profit. For the year ended 31 December 2005, profit after taxation of the project attributable to CII was approximately HK\$9.8 million (2004: nil). It is a National policy to encourage the use of natural gas, which is a relatively clean source of fuel comparing to other means of energy supply, for fuel to reduce air pollution. In addition, the fast development of the Taian City has provided a stable yet favorable investment environment for the project.

The UE Petrochemical project

CII has a 25% effective interest in United East Petrochemical Company Ltd. ("UE Petrochemical"). CII's investment cost in UE Petrochemical is approximately HK\$53.6 million. The principal business of UE Petrochemical are storage of crude oil and oil products, a special purpose terminal for the loading and unloading of crude oil and oil products and crude oil refinery. For the year ended 31 December 2005, profit contribution to CII from UE Petrochemical was limited and amounted to HK\$3.6 million (2004: nil). UE Petrochemical has successfully completed its test-production for oil-refinery during the year but did not engage in large-scale production in light of the recent high crude oil prices, which has significant effect on reducing profit margin. However, CII is currently negotiating with the local partners for long term and secured supplies of crude oil for the oil refinery business. CII has confidence to solve the problem of crude oil supplies. CII believes that the investment in UE Petrochemical will bring good returns to CII.

基礎建設投資

策略上,中基將會在遇到合適機會時出售全部道路及橋樑項目。於二零零五年十二月三十一日,中基仍然持有四個道路及橋樑項目,項目之總帳面值約為407,700,000港元。目前,中基正考慮增加投資於能源供應、煉油加工及其他財務投資。

泰安天然氣管道項目

東聯化工項目

中基擁有東聯化工有限責任公司(「東聯 化工」)25%權益。中基於東聯化工的投 資成本約為53,600,000港元。東聯化工的 主要經營業務為原油及油產品儲存、原 油及油產品裝卸專用碼頭及原油提煉。 於截止二零零五年十二月三十一日止年 度,東聯化工僅為中基提供有限的溢利 貢獻,金額為3,600,000港元(二零零四 年:無)。東聯化工已於年內成功完成煉 油生產測試,但鑑於近期原油價格高企 並將嚴重影響及收窄邊際溢利,故沒有 展開大規模的煉油作業。然而,中基目 前正與中方合作夥伴就煉油業務磋商落 實穩定且長期的原油供應。中基有信心 能解決原油供應問題。中基相信投資東 聯化工將可為中基帶來良好的回報。

Financial Investment

Distressed Assets Business

The Macau Assets

Basically, the disposal of the Macau Assets has substantially been completed during the year. The Group received a further performance return in the amount of HK\$100.0 million from the disposal of the Macau Assets. There is only a small amount of Macau Assets remained and are pending for further disposal. The Directors expect that there will only be nominal income generated from the disposal of the remaining Macau Assets.

The Cinda Portfolio

For the current year, the Cinda Portfolio has contributed HK\$130.9 million interest income to the Group. Up to 31 December 2005, the principal amount of distressed assets in the Cinda Portfolio that has been disposed of was approximately HK\$18.6 billion in aggregate, representing approximately 34.4% of total principal amount of the Cinda Portfolio. The amount of cash recovered was approximately HK\$664.8 million in aggregate. The effective cash recovery rate was approximately 3.6%. The Group has set a target to complete the disposal of the Cinda Portfolio in the second quarter of 2007. To speed up the disposal of the Cinda Portfolio, the Directors of the Company and China Cinda have decided to break the Cinda Portfolio into smaller packages of distressed assets and to dispose of these packages of distressed assets by auctions or other possible means. However, if opportunity arises, the Directors and China Cinda will keep disposing of the Cinda Portfolio on an individual basis, which will have a higher cash recovery rate.

Strategic Partner

By the end of 2005, Citigroup Financial Products Inc. ("CFPI") and the Company strengthened their corporation in the aspects of investing in distressed assets through setting up a joint venture known as Platinum One Limited ("Platinum One"). CFPI and the Company owned Platinum One equally. Both CFPI and the Company have intention to utilize Platinum One as the investment vehicle for all the distressed assets deals identified in the future.

董事總經理報告

The Huarong Portfolio

On 22 November 2005, Platinum One entered into conditional agreements with China Huarong Asset Management Corporation ("China Huarong") to acquire from Huarong a portfolio of distressed assets in the principal amount of RMB36.4 billion (equivalent to HK\$35.0 billion) including booked interests (the "Huarong Portfolio"). The Huarong Portfolio was acquired at a total consideration of RMB546.6 million (equivalent to approximately HK\$525.6 million). The consideration represented 1.5% of the principal amount, including booked interests, of the Huarong Portfolio. At the same time, China Huarong was also appointed to assist Platinum One in servicing the collection of the Huarong Portfolio. Huarong in return is entitled to receive a management fee calculated as 10% of the cash recovered. Huarong is also entitled to share the profits generated from the disposal of the Huarong Portfolio according to a defined profit sharing scheme.

The Huarong Portfolio comprises a total of 11,126 borrowers located in a total of 27 provinces, directly administrated municipalities and autonomies in the PRC. The Group has set a target to complete the disposal of the Huarong Portfolio in two years' time.

Apart from the Huarong Portfolio, CFPI, the Company and Platinum One are actively searching for and are currently considering making investments in one or several distressed assets. Platinum One expects to conclude at least one of them in the near future.

Other Investments

The Group will utilize an appropriate portion of the temporarily idled funds to invest, on a medium term basis, in listed securities. The Directors will make judgment and will invest very selectively in listed securities with good capital appreciation potentials.

In 2005, the Group has conditionally agreed to invest in a 12% equity interest in a Chinese medicine manufacturer known as Tong Ji Tang at a total consideration of RMB100.0 million (equivalent to approximately HK\$96,100 million). The Group has paid a deposit of RMB43.0 million (equivalent to approximately HK\$41.3 million) during the year. The balance will be paid upon the fulfillment of certain condition precedents. The principal business of Tong Ji Tang is the manufacturing of a drug to cure osteoporosis. Tong Ji Tang has planned to seek listing on the Nasdaq and has commenced the prelisting formalities. Tong Ji Tang expects to get listed in the third or fourth quarter of 2006. The Directors believe that investment in Tong Ji Tang will make good profit to the Group.

董事總經理報告

GROWTH STRATEGIES

The Group will continue to invest in the core business of properties, infrastructure investments and financial investments at a balanced pace. The business emphasis will be adjusted according to the prevailing economic environment and market growth trend. Regarding to financial investments, the current target is still to participate mainly in the distressed assets business. In light of favorable conditions brought about by the vigorously growing PRC economy, the Group will keep increasing its investment in distressed assets business, which is expected to bring significant returns to the shareholders. Since the eleventh Five-Years Plan of China is principally to encourage internal demand and expenditure, increased demand and expenditure will inevitably lead to price rises in properties. Therefore, the Group will also increase its investment in the business of property development with an emphasis on developing middle class and medium scale projects and/or "Si He Yuan" projects in principal.

FINANCIAL REVIEW

Exchange Exposure & Hedging

As at 31 December 2005, the Group had a USD denominated convertible notes in the principal amount of USD52.5 million (equivalent to HK\$409.5 million).

Except for the above, the Group's principal assets, liabilities, revenue and payments are denominated in HKD and RMB. Recently the RMB exchange rate is appreciating gradually. The Directors believe that the RMB exchange rate will continue to appreciate gradually in the medium term but there is unlikely to have a sudden surge in the RMB exchange rate. In addition, HKD is pledged to the USD and such currency peg is unlikely to break in the foreseeable future. In this regard, the Directors believe that exposure to exchange rate fluctuations will not have material adverse effect on the Group.

The Group's policy is not to engage in any speculative activity other than making appropriate arrangements for hedging purposes where the business requires. There was no hedging transaction contracted for by the Group during the year.

Working Capital & Borrowings

The Group's total borrowings excluding convertible notes as at 31 December 2005 amounted to approximately HK\$658.7 million of which approximately HK\$651.8 million was short-term bank loan and bank overdraft and the remaining was long-term mortgage loan. Over 80% of the short-term bank loan was represented by the working capital loan to East Gate and the remaining was the current portion of a long-term mortgage loan and bank overdraft. Interest rate for the short-term bank loan was charged at floating rate and the prevailing applicable interest rate was between 4.13% and 5.58 % per annum. The interest rate for the long-term mortgage loan was charged at floating rate and the prevailing applicable interest rate was 5.375% per annum. The Group also has convertible notes with a total outstanding amount of approximately HK\$866.1 million. Approximately 50% of the convertible notes were due within one year and the remaining were due after one year. The convertible notes have a coupon rate of 1.5% per annum but interest for one of the convertible note was charged to income at notional market rate of 4.48% per annum effective from 1 January 2005 in accordance with the new accounting policy.

The Company is negotiating with a local bank for a long-term loan facility in the amount of HK\$600.0 million to HK\$800.0 million for the purpose of replacing the existing RMB denominated working capital loan of East Gate. If concluded, the Group will have a better working capital structure on one hand and can also minimize a possible exchange loss caused by the appreciation of RMB on the other hand.

As at 31 December 2005, the cash and bank balances (net of bank overdraft) was HK\$531.9 million and the net current assets amounted to HK\$238.3 million. In December 2005, the Group paid approximately HK\$527.4 million to acquire the Huarong Portfolio. In January 2006, the disposal of 50% equity interest in Platinum One, which holds the Huarong Portfolio, to CFPI was completed. The Group received approximately HK\$263.7 million payment from CFPI. The Group also made short-term investments in listed securities for the purpose of earning extra returns in the second half year of 2005. Most of those listed securities were subsequently realized in the first quarter of 2006 and recorded very good returns.

Excess of the Group's interest in the net fair value of acquiree's identifiable assets, liabilities and contingent liabilities over cost (previously known as "negative goodwill")

In accordance with HKFRS 3, any excess of the Group's interest in the net fair value of acquiree's identifiable assets, liabilities and contingent liabilities over the cost of acquisition ("discount on acquisition") is recognised immediately in profit or loss in the period in which the acquisition takes place. In previous periods, negative goodwill arising on acquisitions prior to 1 January 2001 was held in reserves, and negative goodwill arising on acquisitions after 1 January 2001 was presented as a deduction from assets and released to income based on an analysis of the circumstances from which the balance resulted. In accordance with the relevant transitional provisions in HKFRS 3, the Group derecognised all negative goodwill on 1 January 2005 (of which negative goodwill of HK\$12,233,000 was previously recorded in reserves and of HK\$59,376,000 was previously presented as a deduction from assets). A corresponding adjustment to the Group's accumulated profits of HK\$71,609,000 has been made. During the year ended 31 December 2005, the Group recognised approximately HK\$73,476,000 of discount on acquisition of additional equity interest in a subsidiary (see Note 3 for the financial impact).

Financial instruments

In the current year, the Group has applied HKAS 32 "Financial instruments: Disclosure and Presentation" and HKAS 39 "Financial instruments: Recognition and Measurement". HKAS 32 requires retrospective application. HKAS 39, which is effective for annual periods beginning on or after 1 January 2005, generally does not permit the recognition, derecognition or measurement of financial assets and liabilities on a retrospective basis. The principal effects of the application of HKAS 32 and HKAS 39 to the Group are summarised below:

業務合併(續)

本集團應佔所收購公司可識別資 產、負債及或然負債之公平值淨 額高於成本的差額(前稱「負商 譽」)

根據香港財務報告準則第3號,本 集團應佔所收購公司的可識別資 產、負債及或然負債之公平值淨 額高於收購成本的差額(「收購折 讓」),應於進行收購的期間即時 確認為溢利或虧損。在以往期 間,於二零零一年一月一日以前 收購所產生的負商譽作儲備入 賬,於二零零一年一月一日後因 收購所產生的負商譽,則作資產 扣減列賬並視乎構成差額的因素 調撥至收入。根據香港財務報告 準則第3號的相關過渡條文,本集 團已於二零零五年一月一日不再 確認所有負商譽(其中負商譽 12,233,000港元以往作儲備入賬, 59,376,000港元以往作資產扣 減),並相應調整增加本集團之累 積溢利71,609,000港元。於截至二 零零五年十二月三十一日止年度 內,本集團確認收購一間附屬公 司額外股本權益之折讓約 73,476,000港元(其財務影響見附 註3)。

Derecognition

HKAS 39 provides more rigorous criteria for the derecognition of financial assets than the criteria applied in previous periods. Under HKAS 39, a financial asset is derecognised, when and only when, either the contractual rights to the asset's cash flows expire, or the asset is transferred and the transfer qualifies for derecognition in accordance with HKAS 39. The decision as to whether a transfer qualifies for derecognition is made by applying a combination of risks and rewards and control tests. The Group has applied the relevant transitional provisions and applied the revised accounting policy prospectively to transfers of financial assets from 1 January 2005 onwards. As a result, the Group's distressed assets of HK\$219,238,000 which were derecognised prior to 1 January 2005 due to partial disposal and recoveries have not been restated.

Classification and measurement of financial assets and financial liabilities

The Group has applied the relevant transitional provisions in HKAS 39 with respect to the classification and measurement of financial assets and financial liabilities that are within the scope of HKAS 39.

2. 應用香港財務報告準則(續)

不再確認

香港會計準則第39號規定,有關不 再確認金融資產採納之準則較以往 期間所採用者更為嚴格。根據香港 會計準則第39號,金融資產僅會於 資產現金流量之合約權利到期時, 或資產已轉讓及有關轉讓根據香港 會計準則第39號符合資格不再確認 時,方會不再確認。混合風險及回 報及控制測試之方式乃用以決定有 關轉讓是否符合不再確認之資格。 本集團已由二零零五年一月一日起 就轉讓金融資產應用相關過渡條文 及應用經修訂之會計政策。因此, 本集團因部分出售及收回而於二零 零五年一月一日前不再確認之不良 資產219,238,000港元並無重列。

Financial assets and financial liabilities other than debt and equity securities

From 1 January 2005 onwards, the Group has classified and measured its financial assets and financial liabilities other than debt and equity securities (which were previously outside the scope of SSAP 24) in accordance with the requirements of HKAS 39. As mentioned above, financial assets under HKAS 39 are classified as "financial assets at fair value through profit or loss", "available-for-sale financial assets", "loans and receivables" or "held-to-maturity financial assets". Financial liabilities are generally classified as "financial liabilities at fair value through profit or loss" or "other financial liabilities". Financial liabilities at fair value through profit or loss are measured at fair value, with changes in fair value being recognised in profit or loss directly. Other financial liabilities are carried at amortised cost using the effective interest method after initial recognition. The change in this accounting policy has had no material effect on results and financial position of the Group except for the interest in distressed assets as described below.

Interest in distressed assets

Prior to 1 January 2005, the Group measured the interest in distressed assets at cost less any subsequent identified impairment loss. The gain or loss arising on the disposal of all or part of the interest in distressed assets was determined as the difference between the sales proceeds and the allocated cost of the assets disposed of and is recognised in the income statement. The income from recoveries of the interest in distressed assets was determined as amount recovered from the individual debtors in excess of the allocated costs and were recognised in the income statement.

From 1 January 2005 onwards, interest in distressed assets which is reclassified as loans and receivables under HKAS 39, is stated at amortised cost using effective interest rate method less impairment allowance. The interest income from interest in distressed assets is accrued on a time basis by reference to the estimated future cashflows and at original effective interest rate. The original effective interest rate is the rate that exactly discounts the estimated future cash inflows arising from recoveries or collection, net of estimated future cash outflows arising from directly attributable costs such as management fee and incentive bonus through the expected life of the distressed assets, to the consideration paid. The impairment allowances are made on loans and receivables when there is objective evidence of impairment as a result of the occurrence of certain loss events that will impact on the estimated future cash flows discounting using the original effective interest rate.

債務及股本證券以外之金融資產及金融負債

自二零零五年一月一日起,本集 團根據香港會計準則第39號之規 定將其債務及股本證券以外之金 融資產及金融負債(過往不屬會計 實務準則第24號之範圍)分類及計 量。誠如上文所述,金融資產根 據香港會計準則第39號分類為「於 損益表按公平值處理的金融資 產」、「可出售金融資產」、「貸款 及應收款項」或「持有至到期日金 融資產」。金融負債一般分類為 「於損益表按公平值處理的金融負 債」或「其他金融負債」。於損益表 按公平值處理的金融負債按公平 值計量,公平值變動直接於損益 表確認。其他金融負債於初步確 認後採用實際利率法按攤銷成本 列賬。除下述不良資產權益外, 此會計政策變動對本集團之業績 及財務狀況並無重大影響。

不良資產權益

自二零零五年一月一日起,根據 財務報告準則第39號規定重新分 類為貸款及應收款項之不良資產 權益採用實際利率法以攤銷成本 扣減減值撥備列賬。不良資產權 益利息收入經參照未償還本金及 估計之未來現金流量及原實際利 率以時間基準計算,原實際利率 為透過不良資產之預計年期,準 確貼現從回收或收集產生之估計 未來現金流入並扣除管理費及獎 金等直接應佔成本後產生之現金 流出至等於已收代價之利率。倘 有客觀證據證明因發生若干會對 採用原實際利率貼現之估計未來 現金流量構成影響之損失事件而 出現減值,則會對貸款及應收款 項作出減值撥備。

Interest in distressed assets (Continued)

This change has resulted in increase in interest in distressed assets of HK\$48,263,000 calculated by using effective interest rate method, deferred tax liability of HK\$14,479,000, and the accumulated profits of HK\$33,784,000 as at 1 January 2005 (see Note 3 for the financial impact).

Convertible note

The principal impact of HKAS 32 on the Group is in relation to convertible notes issued by the Company that contain both liability and equity components. Previously, convertible notes were classified as liabilities and recorded at the proceeds received on the balance sheet. HKAS 32 requires an issuer of a compound financial instrument that contains both financial liability and equity components to separate the compound financial instrument into the liability and equity components on initial recognition and to account for these components separately. In subsequent periods, the liability component is carried at amortised cost using the effective interest method. Because HKAS 32 requires retrospective application, comparative figures for 2004 have been restated. Comparative profit for 2004 has been restated in order to reflect the increase in effective interest on the liability component (see Note 3 for the financial impact).

此變動導致採用實際利率法計算之不良資產權益收入增加48,263,000港元、遞延稅項負債14,479,000港元及於二零零五年一月一日之累積溢利33,784,000港元(其對財務狀況之影響見附註3)。

可換股票據

香港會計準則第32號對本集團的 主要影響乃本公司所發行之可換 股票據含有負債及股本兩部分。 以往,可換股票據分類為負債, 並按已收所得款項於資產負債表 記錄。香港會計準則第32號規定 複合金融工具(含有金融負債及股 本兩部分)發行人須於初次確認時 將該複合金融工具分拆開負債及 股本兩部分並分開列賬處理該兩 部分。在繼後期間,負債部分以 實際利率法按攤銷成本列賬。由 於香港會計準則第32號規定追溯 應用,二零零四年的比較數字已 經重列。本集團二零零四年之比 較溢利已經重列,並反映可換股 票據負債部分實際利息之增加(其 對財務狀況之影響見附註3)。

Convertible note at fair value through profit or loss

Under HKAS 32, a convertible option should only be classified as equity instruments if the conversion option embedded in the convertible notes will be settled by exchange of a fixed amount of cash for a fixed number of the equity instruments. For other embedded options that will be settled other than by the exchange of a fixed amount of cash for a fixed number of the equity instruments, the embedded options would be classified as financial liability. In accordance with HKAS 39, such embedded options are treated as separate derivatives when their economic risks and characteristics are not closely related to those of the host contract (the liability component) and the host contract is not carried at fair value through profit or loss.

On 1 January 2005, the Group has elected to designate its convertible note denominated in US Dollar as financial liabilities at fair value through profit or loss upon application of HKAS 39. At each balance sheet date subsequent to initial recognition, the entire convertible note is measured at fair value, with changes in fair value recognised directly in profit or loss in the period in which they arise. Previously, the convertible notes are classified as liabilities and recorded at the proceeds received on the balance sheet. In accordance with relevant provisions of HKAS 39, the carrying amount of the convertible note as at 1 January 2005 was increased by HK\$236,747,000 with a corresponding decrease in accumulated profits, being the fair value adjustment on 1 January 2005 (see Note 3 for the financial impact).

Transaction costs that are directly attributable to the issue of the convertible note designated as financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

2. APPLICATION OF HONG KONG FINANCIAL REPORTING STANDARDS (Continued)

Owner-occupied leasehold interest in land

In previous years, owner-occupied leasehold land and buildings were included in property, plant and equipment and measured using the revaluation model. In the current year, the Group has applied HKAS 17 Leases. Under HKAS 17, the land and buildings elements of a lease of land and buildings are considered separately for the purposes of lease classification, unless the lease payments cannot be allocated reliably between the land and buildings elements, in which case, the entire lease is generally treated as a finance lease. To the extent that the allocation of the lease payments between the land and buildings elements can be made reliably, the leasehold interests in land are reclassified to prepaid lease payments under operating leases, which are carried at cost and amortised over the lease term on a straight-line basis. Alternatively, where the allocation between the land and buildings elements cannot be made reliably, the leasehold interests in land continue to be accounted for as property, plant and equipment. The adoption of this standard has had no material effect on how the results for the current or prior accounting years are prepared and presented.

Investment properties

In the current year, the Group has, for the first time, applied HKAS 40 Investment Property. The Group has elected to use the fair value model to account for its investment properties which requires gains or losses arising from changes in the fair value of investment properties to be recognised directly in profit or loss for the year in which they arise. In previous years, investment properties under the predecessor Standard were measured at open market values, with revaluation surplus or deficits credited or charged to investment property revaluation reserve unless the balance on this reserve was insufficient to cover a revaluation decrease, in which case the excess of the revaluation decrease over the balance on the investment property revaluation reserve was charged to the income statement. Where a decrease had previously been charged to the income statement and a revaluation surplus subsequently

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Basis of consolidation (Continued)

All intra-group transactions, balances, income and expenses are eliminated on consolidation.

Minority interests in the net assets of consolidated subsidiaries are presented separately from the Group's equity therein. Minority interests in the net assets consist of the amount of those interests at the date of the original business combination and the minority's share of changes in equity since the date of the combination. Losses applicable to the minority in excess of the minority's interest in the subsidiary's equity are allocated against the interests of the Group except to the extent that the minority has a binding obligation and is able to make an additional investment to cover the losses.

Goodwill

Goodwill arising on acquisitions prior to 1 January 2005

Goodwill arising on an acquisition of a subsidiary for which the agreement date is before 1 January 2005 represents the excess of the cost of acquisition over the Group's interest in the fair value of the identifiable assets and liabilities of the relevant subsidiary at the date of acquisition.

For previously capitalised goodwill arising on acquisition after 1 January 2001, the Group has discontinued amortisation from 1 January 2005 onwards, and such goodwill is tested for impairment annually, and whenever there is an indication that the cash generating unit to which the goodwill relates may be impaired (see the accounting policy below).

Goodwill arising on acquisitions on or after 1 January 2005

Goodwill arising on an acquisition of a subsidiary for which the agreement date is on or after 1 January 2005 represents the excess of the cost of acquisition over the Group's interest in the fair value of the identifiable assets, liabilities and contingent liabilities of the relevant subsidiary at the date of acquisition. Such goodwill is carried at cost less any accumulated impairment losses. Capitalised goodwill arising on an acquisition of a subsidiary is presented separately in the balance sheet.

Goodwill arising on acquisitions on or after 1 January 2005 (Continued)

For the purposes of impairment testing, goodwill arising from an acquisition is allocated to each of the relevant cashgenerating units, or groups of cash-generating units, that are expected to benefit from the synergies of the acquisition. A cash-generating unit to which goodwill has been allocated is tested for impairment annually, and whenever there is an indication that the unit may be impaired. For goodwill arising on an acquisition in a financial year, the cash-generating unit to which goodwill has been allocated is tested for impairment before the end of that financial year. When the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated to reduce the carrying amount of any goodwill allocated to the unit first, and then to the other assets of the unit pro rata on the basis of the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in the income statement. An impairment loss for goodwill is not reversed in subsequent periods.

On subsequent disposal of a subsidiary, the attributable amount of goodwill capitalised is included in the determination of the amount of profit or loss on disposal.

Excess of an acquirer's interest in the net fair value of an acquiree's identifiable assets, liabilities and contingent liabilities over cost ("discount on acquisitions")

A discount on acquisition arising on an acquisition of a subsidiary or acquisition of additional interest in a subsidiary for which an agreement date is on or after 1 January 2005 represents the excess of the net fair value of an acquiree's identifiable assets, liabilities and contingent liabilities over the cost of the business combination or consideration. Discount on acquisition is recognised immediately in profit or loss.

As explained in Note 3 above, all negative goodwill as at 1 January 2005 has been derecognised with a corresponding adjustment to the Group's accumulated profits.

Investments in associates

The results and assets and liabilities of associates are incorporated in these financial statements using the equity method of accounting. Under the equity method, investments in associates are carried in the consolidated balance sheet at cost as adjusted for post-acquisition changes in the Group's share of the profit or loss and of changes in equity of the associate, less any identified impairment loss. When the Group's share of losses of an associate equals or exceeds its interest in that associate (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate), the Group discontinues recognising its share of further losses. An additional share of losses is provided for and a liability is recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of that associate.

Where a group entity transacts with an associate of the Group, profits and losses are eliminated to the extent of the Group's interest in the relevant associate.

Investment properties

On initial recognition, investment properties are measured at cost, including any directly attributable expenditure. Subsequent to initial recognition, investment properties are measured using the fair value model. Gains or losses arising from changes in the fair value of investment property are included in profit or loss for the period in which they arise.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use or no future economic benefits are expected from its disposals. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement in the year in which the item is derecognised.

Property, plant and equipment

Property, plant and equipment are stated at cost or fair value less accumulated depreciation and identified impairment loss.

Property, plant and equipment

Land and buildings held for use in the production or supply of goods or services, or for administrative purpose, are stated in the balance sheet at their revalued amount, being the fair value at the date of revaluation less any subsequent accumulated impairment losses and subsequent accumulated depreciation. Revaluations are performed with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair values at the balance sheet date.

Any surplus arising on revaluation of land and buildings is credited to the asset revaluation reserve, except to the extent that it reverses a revaluation deficit of the same asset previously recognised as an expense, in which case this surplus is credited to the income statement to the extent of the deficit previously charged. A decrease in net carrying amount arising on revaluation of an asset is charged to the income statement to the extent that it exceeds the balance, if any, on the asset revaluation reserve relating to a previous revaluation of that asset. On the subsequent sale or retirement of a revalued asset, the attributable revaluation surplus is transferred to accumulated profits.

Depreciation is provided to write off the cost or fair value of property, plant and equipment over their estimated useful lives, using the straight line method on the following basis:

Leasehold land and buildings
Leasehold improvements

Furniture and fixtures

Office equipment

Motor vehicles

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the income statement in the year in which the item is derecognised.

Non-current assets held for sales

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather then through continuing use. This condition is regarded as met only when the sale is highly probable and the assets (or disposal groups) is available for immediate sale in it present condition.

Non-current assets and disposal groups classified as held for sale are measured at the lower of the assets' (or disposal groups') previous carrying amount and fair value less costs to sell.

Stock of properties

Stock of properties represents properties under development for sale and properties held for sale.

The carrying value of properties under development comprises the interest in leasehold land together with development expenditure, which includes construction costs, capitalised interest and ancillary borrowing costs, less foreseeable losses. The stock of properties are stated at the lower of cost and net realisable value.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is calculated using the weighted average method.

Revenue recognition

The interest income from interest in distressed assets is accrued on a time basis by reference to the estimated future cashflows and at effective interest rate. The effective interest rate is the rate that exactly discounts the estimated future cash inflows arising from recoveries or collection, net of the estimated future cash outflows arising from directly attributable costs such as management fee and incentive bonus through the expected life of the distressed assets, to the assets' net carrying amounts.

In prior period, the income from recoveries of interest in distressed assets was recognised in the income statement, on individual distressed asset basis, which was determined as amount recovered from the individual debtors in excess of the allocated costs. The gain or loss arising on the disposal of all or part of the interest in distressed assets was determined as the difference between the sales proceeds and allocated the cost of the assets disposed of and is recognised in the income statement.

Other interest income is accrued on a time basis by reference to the principal outstanding and at the interest rate applicable, which is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount.

Income from the trading of securities is recognised on a trade date basis.

Dividends from investments are recognised when the rights to receive the dividend payment have been established.

When a development property is sold in advance of completion, income is recognized only when the property is completed and has passed the inspection process. Deposits received from the purchasers prior to this stage are recorded as customers' deposits and included in current liabilities.

Income from properties developed for sales, which have not been pre-sold prior to completion of development is recognised on the execution of legally binding, unconditional and irrevocable sales contracts.

Financial instruments

Financial assets and financial liabilities are recognised on the balance sheet when a group entity becomes a party to the contractual provisions of the instrument. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Financial assets

The Group's financial assets are classified into one of the three categories, including financial assets at fair value through profit or loss, loans and receivables and available-for-sale financial assets. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. The accounting policies adopted in respect of each category of financial assets are set out below.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss has two subcategories, including financial assets held for trading and those designated at fair value through profit or loss on initial recognition. At each balance sheet date subsequent to initial recognition, financial assets at fair value through profit or loss are measured at fair value, with changes in fair value recognised directly in profit or loss in the period in which they arise.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. At each balance sheet date subsequent to initial recognition, loans and receivables (including interest in distressed assets, trade receivables, deposits and other receivables, amount due from associates, restricted bank balance and bank deposits) are carried at amortised cost using the effective interest method, less any identified impairment losses. An impairment loss is recognised in profit or loss when there is objective evidence that the asset is impaired, and is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. Impairment losses are reversed in subsequent periods when an increase in the asset's recoverable amount can be related objectively to an event occurring after the impairment was recognised, subject to a restriction that the carrying amount of the asset at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

Loans and receivables — Interest in distressed assets

Prior to 1 January 2005, the interest in distressed assets was stated at cost less any subsequent identified impairment loss. The impairment loss was made when the recoverable amount of the interest in distressed assets was estimated to be less than its carry amount, and is measured as the difference between the carrying amount and the recoverable amount of the interest in the distressed assets on an individual basis.

From 1 January 2005 onwards, interest in distressed assets which is reclassified as loans and receivables under HKAS 39 is stated at amortised cost using effective interest rate method less impairment allowance. The impairment allowances are made on the interest in distressed assets when there is objective evidence of impairment as a result of the occurrence of certain loss events that will impact on the estimated future cash flows, and are measured as the difference between the carrying amount of the distressed assets and the present value of the estimated future cash flows discounted at the original effective interest rate. Where the actual future net cash inflows are more than expected, the revised cashflow will be discounted using the effective interest rate. The difference between the carrying amounts will be adjusted to reflect the revised estimated cash flows discounted using the original effective rate. The adjustment is recognized in the income statement.

The adjustment is recognized in the income statement.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated or not classified as any of the other categories under HKAS 39. At each balance sheet date subsequent to initial recognition, available-for-sale financial assets are measured at fair value. Changes in fair value are recognised in equity, until the financial asset is disposed of or is determined to be impaired, at which time, the cumulative gain or loss previously recognised in equity is removed from equity and recognised in profit or loss. Any impairment losses on available-for-sale financial assets are recognised in profit or loss. Impairment losses on available-for-sale equity investments will not reverse in subsequent periods. For available-for-sale debt investments, impairment losses are subsequently reversed if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss.

For available-for-sale equity investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured and derivatives that are linked to and must be settled by delivery of such unquoted equity instruments, they are measured at cost less any identified impairment losses at each balance sheet date subsequent to initial recognition. An impairment loss is recognised in profit or loss when there is objective evidence that the asset is impaired. The amount of the impairment loss is measured as the difference between the carrying amount of the asset and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses will not reverse in subsequent periods.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and short term deposits with an original maturity of not more than three months, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. Bank balances and short term deposits are subsequently measured at amortized cost using the effective interest rate method.

Financial instruments (Continued)

Financial liabilities and equity

Financial liabilities and equity instruments issued by a group entity are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

An equity instrument is any contract that evidences a residual interest in the assets of the group after deducting all of its liabilities. The Group's financial liabilities are generally classified into financial liabilities at fair value through profit or loss and other financial liabilities. The accounting policies adopted in respect of financial liabilities and equity instruments are set out below.

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss has two subcategories, including financial liabilities held for trading and those designated at fair value through profit or loss on initial recognition. At each balance sheet date subsequent to initial recognition, financial liabilities at fair value through profit or loss are measured at fair value, with changes in fair value recognised directly in profit or loss in the period in which they arise.

Other financial liabilities

Other financial liabilities including trade payables, deposits, other payables, accruals for management fee to holding company of a shareholder, amounts due to associates and bank borrowings are subsequently measured at amortised cost, using the effective interest rate method.

The transaction costs that are directly attributable to borrowings are included in the carrying amount on the initial recognition. The difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognized using effective interest rate method.

Equity instruments

Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

Convertible note

Convertible notes issued by the Company that contain both financial liability and equity components are classified separately into respective liability and equity components on initial recognition. On initial recognition, the fair value of the liability component is determined using the prevailing market interest of similar non-convertible debts. The difference between the proceeds of the issue of the convertible notes and the fair value assigned to the liability component, representing the embedded call option for the holder to convert the notes into equity, is included in equity (convertible notes equity reserve).

In subsequent periods, the liability component of the convertible note is carried at amortised cost using the effective interest method. The equity component, represented by the option to convert the liability component into ordinary shares of the Company, will remain in convertible notes equity reserve until the embedded option is exercised (in which case the balance stated in convertible notes equity reserve will be transferred to share premium). Where the option remains unexercised at the expiry date, the balance stated in convertible notes equity reserve will be released to the retained earnings. No gain or loss is recognised in profit or loss upon conversion or expiration of the option.

Transaction costs that relate to the issue of the convertible loan notes are allocated to the liability and equity components in proportion to the allocation of the proceeds. Transaction costs relating to the equity component are charged directly to equity. Transaction costs relating to the liability component are included in the carrying amount of the liability portion and amortised over the period of the convertible note using the effective interest method.

Convertible note at fair value through profit or loss

Convertible notes that will or may not be settled by the exchange of a fixed amount of cash for a fixed number of the Company's own equity instruments are accounted as financial liabilities with embedded derivatives. Derivatives embedded in a financial instrument are treated as separate derivatives when their economic risks and characteristics are not closely related to those of the host contract (the liability component) and the host contract is not carried at fair value through profit or loss.

Convertible note at fair value through profit or loss (Continued)

The convertible note with embedded derivatives as a whole is designated as financial liabilities at fair value through profit or loss. At each balance sheet date subsequent to initial recognition, the entire convertible note is measured at fair value, with changes in fair value recognised directly in profit or loss in the period in which they arise.

Transaction costs that are directly attributable to the issued of the convertible notes designated as financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, are capitalised as part of the cost of those assets. Capitalisation of such borrowing costs ceases when the assets are substantially ready for their intended use or sale.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

Impairment

At each balance sheet date, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised as an expenses immediately, unless the relevant asset is carried at a revalued amount under another standard, in which case the impairment loss is treated as a revaluation decrease under that standard.

Where an impairment loss subsequently reverses, the carrying amount of the assets is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised immediately, unless the relevant asset is carried at a revalued amount under another standard, in which case the reversal of the impairment loss is treated as a revaluation increase under that standard.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years, and it further excludes income statement items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantially enacted by the balance sheet date.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences arising on investment in subsidiaries, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Deferred tax is charged or credited to the income statement, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

Foreign currencies

In preparing the financial statements of each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recorded in its functional currency (i.e. the currency of the primary economic environment in which the entity operates) at the rates of exchanges prevailing on the dates of the transactions. At each balance sheet date, monetary items denominated in foreign currencies are retranslated at the rates prevailing on the balance sheet date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the translation of monetary items, are recognised in profit or loss in the period in which they arise. Exchange differences arising on the retranslation of non-monetary items carried at fair value are included in profit or loss for the period except for differences arising on the retranslation of non-monetary items in respect of which gains and losses are recognised directly in equity, in which cases, the exchange differences are also recognised directly in equity.

For the purposes of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into the presentation currency of the Group (i.e. Hong Kong dollars) at the rate of exchange prevailing at the balance sheet date, and their income and expenses are translated at the average exchange rates for the year, unless exchange rates fluctuate significantly during the period, in which case, the exchange rates prevailing at the dates of transactions are used. Exchange differences arising, if any, are recognised as a separate component of equity (the translation reserve). Such exchange differences are recognised in profit or loss in the period in which the foreign operation is disposed of.

Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Group as lessor

Rental income from operating leases is recognised in the income statement on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised as an expense on a straight-line basis over the lease term.

4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

The Group as lessee

Rentals payable under operating leases are charged to profit or loss on a straight-line basis over the term of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are recognised as a reduction of rental expense over the lease term on a straight-line basis.

Retirement benefit costs

Payments to the state-managed retirement benefit schemes for staff in the People's Republic of China, excluding Hong Kong and Macau (the "PRC") and to the Mandatory Provident Fund Scheme for staff in Hong Kong are charged as expense as they fall due.

5. KEY SOURCES OF ESTIMATION UNCERTAINTY

Estimated impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the Group to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate the present value. As at 31 December 2005, the carrying amount of goodwill is approximately HK\$33,525,000. Details of the recoverable amount calculated are disclosed in note 21.

Impairment allowances of loans and receivables

The policy for impairment of loans and receivables of the Group is based on the evaluation of expected future cash flows on management's judgment. A considerable amount of judgment is required in estimating the expected future cash flows. If the future estimated cash flows are less than expected, additional allowances may be required.

4. 主要會計政策(續)

本集團作為承租人

6. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's major financial instruments include available-for-sale investments, interest in distressed assets, loans receivables, held-for-trading investments, trade receivables, deposits and other receivables, amounts due from associates, restricted bank balance, pledged bank deposit, bank balances and cash, assets classified as held for sale, trade payables, rental deposits and other payables, amount due to associates, accruals for management fee to holding company of a shareholder, borrowings, convertible note and convertible note at fair value through profit or loss. Details of these financial instruments are disclosed in respective notes. The risks associated with these financial instruments and the policies on how to mitigate these risks are set out below. The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

Credit risk

The Group's maximum exposure to credit risk in the event of the counterparties' failure to perform their obligations as at 31 December 2005 in relation to each class of recognised financial assets is the carrying amount of those assets as stated in the consolidated balance sheet. In order to minimise the credit risk, the directors continuously monitor the level of exposure to ensure that follow-up action and/or corrective actions are taken promptly to lower exposure or even to recover overdue debts. In addition, the Group reviews the recoverable amount of each significant individual loan and interest in distressed asset at each balance sheet date to ensure that adequate impairment losses are made for irrecoverable amounts. In this regard, the directors of the Company consider that the Group's credit risk is significantly reduced.

The credit risk on liquid funds is limited because majority of the counter parties are banks with high credit ratings assigned by international credit-rating agencies and state owned banks with good reputation. The Group has no significant concentration of credit risk, with exposure spread over a large number of counter parties and customers.

6. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (Continued)

Interest rate risk

The Group has exposed to both fair value interest rate risk and cash flows interest rate risk through the impact of the rate changes on fixed interest rate bank borrowings and floating interest rate bank borrowings respectively.

The Group currently does not have an interest rate hedging policy. However, the management monitors interest rate exposure and will consider repaying bank borrowings when significant interest rate exposure is anticipated.

Price risk

The Group's available-for-sale investments and investments held for trading are measured at fair value, except for those unlisted equity investments of which fair values cannot be measured reliable, at the balance sheet date. Therefore, the Group is exposed to equity and debt security price risk. The management manages the exposure by maintaining a portfolio of investments with different risk profiles.

Currency risk

Certain borrowings of the Group are denominated in US Dollar. The Group currently does not have a foreign currency hedging policy. However, the management monitors foreign exchange exposure and will consider hedging significant foreign currency exposure should the need arises.

31 December 2005	二零零五年十二月三十一日	33,525

Until 31 December 2004, goodwill arising on acquisition of subsidiaries had been amortised over the estimated useful life of 10 years.

As explained in Note 7, the Group uses business segments as its primary segment for reporting segment information. For the purposes of impairment testing, goodwill set out above has been allocated to an individual cash generating unit (CGU) which is in property management segment.

During the year ended 31 December 2005, management of the Group determines that there is no impairment of its CGU containing goodwill with intangible useful lives.

The recoverable amount of this unit has been determined based on a value in use calculation. That calculation uses cash flow projections based on financial budgets approved by management covering a five-year period based on estimated growth rate of 10% and the further five years with zero growth rate, with the discount rate of 8.25%. Another key assumption for the value in use calculations is the budgeted revenue and gross margin, which is determined based on the unit's past performance and management's expectations for the market development.

直至二零零四年十二月三十一日 為止,收購附屬公司產生之商譽 按可使用年期10年攤銷。

誠如附註7所闡釋,本集團採用業務分類作為呈報分類資料之基本分類。就減值檢測而言,上文所載之商譽已獲分配至物業管理分類之個別現金產生單位(現金產生單位)。

於截至二零零五年十二月三十一 日止年度內,本集團管理層確定 其任何含有具不確定可使用年期 商譽之現金產生單位均無出現減 值。

26. AVAILABLE-FOR-SALE INVESTMENTS (Continued)

The above unlisted investments represent investments in unlisted equity securities and debentures issued by private entities. They are measured at cost less impairment at each balance sheet date because the range of reasonable fair value estimates is so significant that the directors of the Company are of the opinion that their fair values cannot be measured reliably.

The directors reviewed the carrying amounts of available-forsale investments and identified that they were impaired. Accordingly, an impairment loss of HK\$2,070,000 was recognised in the financial statements to write down the carrying amount of the investments due to substantial loss incurred by the investee company, the directors are in the opinion that the invested amount are not recoverable.

26. 可出售投資(續)

上述非上市投資指私人實體發行之非上市股本證券及債券投資。由於合理公平值估計之範圍太,本公司董事認為其公平值無法可靠地計量,故該等投資乃於各結算日以成本減值計量。

董事檢討可出售投資之賬面值,並認為該等投資出現減值。因此,由於所投資公司產生重大虧損,董事認為投資額無法收回,故已於財務報表內確認減值虧損2,070,000港元,以撇減投資之賬面值。

(b) Convertible note

The stock price was the closing price at the respective balance sheet dates while the expected volatility was determined by calculating the historical volatility of the Company's share price over the previous year.

Because the Binomial model requires the input of highly subjective assumptions, including the volatility of share price, changes in subjective input assumptions can materially affect the fair value estimate.

On 23 November 2004, the Company issued a convertible note in the principal amount of HK\$440 million to Catic Limited, a shareholder of the Company, in accordance with a convertible note subscription agreement dated 20 September 2004 entered into between the Company and Catic Limited. The interest rate is 1.5% per annum and payable semi-annually in arrears. The Company shall repay principal amount outstanding under the convertible note to the noteholder together with all interest accrued on the second anniversary of the date of the issue of the convertible note. The conversion price is HK\$2.20 per share, subject to adjustment for, among other matters, subdivision or consolidation of shares, bonus issues, capital reduction, rights issues and other events which have diluting effects on the issued share capital of the Company. The noteholder will have the right to convert the whole or part of the principal amount of the convertible note into shares at any time and from time to time, from the date of issue of the convertible note up to the second anniversary of the issue of the convertible note in amount not less than HK\$30,000,000 on each conversion, save that if at any time, the principal outstanding amount of the convertible note is less than HK\$30,000,000, the whole (but not part only) of the principal amount of the convertible note may be converted. Shares to be issued upon conversion shall rank pari passu in all respects with all other existing shares outstanding at the date of the conversion.
